

## PROJECT "FORMER AIRFIELD BÖBLINGEN-SINDELFINGEN"

### Storm Water Harvesting and Reuse Project

In this 85 ha project, the entire storm water runoff is proposed to be collected, treated and reused as a substitute for drinking water used in recreation, irrigation, toilet flushing, washing machines and still further uses where drinking water quality is not required. The excess water is discharged to a river bed.

The basic aim here is that all of the storm water will be reused within the project area.

Present status: Master plan
